## **Are you curious to know how YOUR computer network stacks up? Schedule your NO-COST analysis today.**

The AMP (Action Management Plan) Audit service is **normally sold for \$349**, but if you are one of the first 4 Companies this month to respond, it's yours at **NO COST! HURRY!**

At your convenience, we will schedule a Senior Engineer to arrive at your office and conduct a 30-point integrity assessment of your network. The results will be available within about one week and will provide the following:

- 1 Zero in on greatest exposures & potential risks** in the areas of security, data backup and disaster recovery, power surges / outages, and network server / workstation failures.
- 2 Provide a comprehensive outline and defense strategy** for thwarting the most stealthy computer spyware, spam, viruses, & hackers designed specifically for your network.
- 3 Make recommendations for optimizing your network to increase speed for both your internal network and the internet.** Identify key areas for controlling the cost of your email, Internet service, and your phone bill!
- 4 Provide Current Network Documentation.** We analyze your existing configuration and document it for future reference. This way, your technicians will know exactly how your network is configured. Many IT organizations charge greater than \$300 for this service alone.

We will also provide you with an **Action Management Plan (AMP)**. This Plan is a detailed action report that explains the pain points and risks for security, data loss and potential outages or other issues. This report means you can now get a good night's sleep.

**Other businesses pay over \$495 for a similar audit, but it's yours at no cost - \$ZERO, just for saying "maybe."** We can only do 4 audits per month, **Don't Delay – Act Today!**
